

Aircool Systems Ltd

Condenser Cleaning 'Mini-Service'

Aircool Systems Ltd. has been providing sales, maintenance and service facilities for commercial refrigeration equipment users in the South West for over ten years. Our customer base includes hospitals and large café chains through to small independent coffee shops.

Over half of the service calls we have carried out in the last 12 months have been due to condensers and air conditioning filters not being cleaned regularly. Most equipment requires condensers or filters to be cleaned monthly, however in busy shops and restaurants this is often forgotten. Blocked condensers make the equipment more expensive to run and will reduce its lifespan. As it can be expensive to have an engineer carry out condenser cleaning (and even more expensive to have them fix resulting breakdowns) we have launched a simple, inexpensive service to take care of the problem.

What we do

We will call on a bi-monthly or quarterly basis to clean condensers on your refrigeration equipment. We will also carry out a visual check of door gaskets, the temperature achieved by the equipment and any other visible potential problems. With regard to air conditioning, we will clean indoor unit filters and outdoor condensers (as long as there is easy access).

If we find a problem we will recommend that you call an engineer. We can arrange for one of our own engineers to visit at our normal call-out and hourly rates, or you can find your own.

What we do not do during cleaning visits

We will not normally carry out any other repairs or maintenance; this would be done at our normal call-out rate. We will not empty refrigeration equipment of stock etc. as this is something for your own staff to do. We will only call during normal working hours, i.e. 9.00 a.m. - 5:00 p.m. Monday to Friday.

We understand that busy times such as lunchtimes in restaurants are not ideal and will always do our best to avoid them.

What it costs

For most integral refrigeration equipment the cost is £10.00 + VAT per unit, based on a minimum of 3 units. For air conditioning and remote condensing unit coldrooms the cost is £12.00 + VAT per refrigeration system.

Other repairs

We will happily carry out other repairs to most commercial refrigeration and air conditioning – please do contact us for details.
